SUMMARY

Cloud Operations Engineer with 3+ years of experience as a Platform Support Engineer delivering 24x7x365 SaaS application support on AWS and Azure for Fortune 500 clients at PTC. Strong skills in pod-level Kubernetes troubleshooting, Java application performance analysis, MySQL database troubleshooting, network and VPN connectivity, and full lifecycle incident management through ITSM tools. Managed 5,000+ production incidents with 99.9% uptime, reduced MTTR by 30%, and authored 15+ runbooks adopted across the team. Resilient and accountable operator with end-to-end ownership of platform stability, reliability, and customer satisfaction.

SKILLS

Cloud Operations: AWS Cloud Operations, Azure Cloud Operations, Multi-Cloud Operations, SaaS Operations, Platform Support, Application Support, 24x7 On-Call, Operational Ownership, End-to-End Accountability

Cloud Platforms: Amazon Web Services (EC2, S3, VPC, IAM, CloudWatch, RDS, EKS), Microsoft Azure (AKS, App Services, Key Vault, App Insights, VNet)

Containers and Kubernetes: Kubernetes, AKS, EKS, Docker, Helm, kubectl, Pod-Level Troubleshooting, Container Diagnostics, Node Pressure Analysis, Pod Failures, Restart Loops

Application Support: Java, Spring Boot, Hibernate, JVM Memory Tuning, Heap Analysis, Application Performance Analysis, Application Troubleshooting, Log Analysis

Databases: MySQL, RDS, Oracle, SQL, Database Troubleshooting, L2 Database Support, Query Performance Analysis, Performance Monitoring

Monitoring and Observability: Grafana, Prometheus, Elastic Search, Sumo Logic, Zabbix, Splunk, Dynatrace, PagerDuty, Catchpoint, Application Insights, Log Management, Dashboards, Alert Management

ITSM and Incident Management: ServiceNow, FreshService, ITIL, IT Service Management, Incident Management, Problem Management, Service Request Management, Change Management, Escalation Management, Root Cause Analysis, SLA Adherence, KPI Tracking

Networking: Networking, TCP/IP, DNS, IP Addressing, VPN, LDAP, SSL/TLS, Load Balancers, Firewalls, VPC, Subnetting, Network Troubleshooting, Network Connectivity, External Network Connections

Operating Systems, Scripting, and Soft Skills: Linux (RHEL, CentOS, Ubuntu), Bash Scripting, Python, SSH, Cron, Systemd, Automation, Runbook Development, Troubleshooting, Problem-Solving, Analytical, Resolve Issues, Reliability, Resilience, Accountability, Customer Communication, Mentoring

WORK EXPERIENCE

NOC Engineer - Specialist

December 2025 - Present

Parametric Technology Corporation (PTC), Pune, India

- Lead 24x7x365 platform support for 50+ Fortune 500 client environments running enterprise SaaS applications on AWS and Azure, ensuring stability, performance, and reliability.
- Drive end-to-end operational ownership for Sev0 through Sev3 incidents via on-call rotation, providing technical guidance during critical incidents and reducing repeat incidents by 35%.
- Mentor 5+ junior engineers technically by reviewing root cause analyses and escalation decisions, improving team-wide incident resolution quality by 25%.
- Plan and coordinate scheduled maintenance with minimal impact to service availability, ensuring SLA adherence and customer satisfaction.

NOC Engineer - Associate

December 2022 - November 2025

Parametric Technology Corporation (PTC), Pune, India

- Triaged and resolved 5,000+ production incidents across AWS and Azure for Fortune 500 clients, achieving 99.9% uptime across 50+ SaaS client environments.
- Performed pod-level Kubernetes troubleshooting in AKS and EKS, diagnosing pod failures, node pressure events, and container restart loops beyond simple restarts, reducing cluster downtime by 50%.
- Investigated Java application performance issues including JVM memory tuning, heap analysis, and log pattern correlation across 200+ production servers, reducing recurring incidents by 25%.
- Troubleshoot MySQL and RDS database performance issues at L2 level including query analysis and connection pool tuning.
- Managed full lifecycle of alerts, incidents, and service requests through ServiceNow and PagerDuty, ensuring timely logging, prioritization, resolution, and escalation per defined SLAs.
- Reduced MTTR by 30% from 45 minutes to under 30 minutes and cut false-positive alerts by 60% by tuning monitoring thresholds in Zabbix and Sumo Logic, saving 200+ engineering hours annually.
- Authored 15+ operational runbooks and knowledge base articles adopted by 20+ engineers, standardizing incident resolution and reducing service request turnaround time by 25%.
- Troubleshoot network connectivity issues including VPN, DNS, IP addressing, and LDAP authentication across customer-facing applications.

Programmer Analyst Trainee

January 2022 - June 2022

Cognizant Technology Solutions, Bangalore, India

- Developed a full-stack insurance management application using Java, Spring Boot, and MySQL, delivering 10+ REST API endpoints and reducing integration defects by 20% through Git-based version control and structured code reviews.

ACHIEVEMENTS

- Received Customer First Award at PTC for exceptional operational impact and customer satisfaction across 50+ enterprise SaaS accounts.
- Won Smart India Hackathon at the national level, competing against 10,000+ teams.
- Attended KubeCon and CloudNativeCon India 2025, networking with 2,000+ cloud native professionals.

CERTIFICATIONS

- Microsoft Certified: AZ-900 Azure Fundamentals - Microsoft, 2023.
- Microsoft Certified: DP-900 Data Fundamentals - Microsoft, 2023.
- Advanced Kubernetes Operations and Linux System Administration - KodeKloud, 2024.

EDUCATION

MBA - Information System Management / Analytics and Data Science | Manipal University Jaipur | 2025 - 2027 (Expected)

Bachelor of Engineering - Electronics and Instrumentation | Panimalar Engineering College | 2018 - 2022 | CGPA: 8.1 out of 10
