PROFESSIONAL SUMMARY

Cloud Services NOC / Reliability Engineer with 3.5+ years running 24x7 production operations for enterprise SaaS platforms on AWS and Azure, serving 50+ Fortune 500 customers. Resolved 5,000+ incidents with a focus on triage, root-cause analysis and blameless post-mortems. Hands-on with observability tooling (Zabbix, Prometheus, Grafana, Sumo Logic, Catchpoint), Linux systems administration, Python/Bash automation, and infrastructure-as-code with Terraform and CI/CD. AZ-900 and DP-900 certified, CKA in progress, pursuing an MBA alongside deeper SRE and platform-reliability work.

TECHNICAL SKILLS

Reliability & SRE	Incident response, on-call, RCA, blameless post-mortems, SLI/SLO awareness, runbook automation, capacity monitoring
Observability	Zabbix, Prometheus, Grafana, Sumo Logic, Catchpoint, PagerDuty, Azure Monitor
Cloud	AWS (EC2, S3, CloudWatch), Microsoft Azure, AKS
IaC & CI/CD	Terraform, GitHub Actions, Git, GitOps practices
Systems & Scripting	Linux/Unix administration, Python, Bash, networking fundamentals
Databases	PostgreSQL (production query, troubleshooting & support)
Containers & ITSM	Docker, Kubernetes (CKA in progress), ServiceNow, ITIL incident/problem/change

PROFESSIONAL EXPERIENCE

Cloud Services NOC Engineer (Specialist) — PTC Inc.

Nov 2025 - Present

Pune, India | Promoted from Associate; enterprise SaaS on AWS and Azure

- Own 24x7 production monitoring and incident response for Windchill PDMLink, ThingWorx, FlexPLM and Vuforia across 50+ Fortune 500 customers, sustaining high-availability SLAs.
- Drive triage, root-cause analysis and blameless post-mortems on Severity 1/2 incidents; proactively raised 50+ issues before customer impact using observability signals.
- Build and tune observability across Zabbix, Prometheus, Grafana, Sumo Logic and Catchpoint; investigate alerts surfaced through AWS CloudWatch and Azure Monitor.
- Automate recurring operational tasks with Python and Bash; maintain 10+ runbooks to standardise response and reduce mean time to resolution.
- Query, troubleshoot and support PostgreSQL databases in production to investigate data-layer issues and resolve customer-impacting incidents.

Cloud Services NOC Engineer (Associate) — PTC Inc.

Dec 2022 - Nov 2025

Pune, India

- Resolved 5,000+ incidents across a 12-member 24x7 operations team supporting mission-critical SaaS workloads on multi-cloud infrastructure.
- Partnered with engineering on change reviews and production readiness, applying ITIL incident, problem and change management via ServiceNow.
- Contributed to monitoring coverage, alert quality and capacity observations to improve reliability and reduce noise for on-call engineers.

PROJECTS

Zabbix Monitoring Lab

Built a self-hosted Zabbix observability lab: configured hosts, templates, triggers and dashboards to detect and alert on service degradation, mirroring production monitoring practices from my day-to-day NOC work.

Zabbix, Linux, SNMP, alerting

Self-Healing Infrastructure on AWS

Built and validated Terraform infrastructure designed to detect and replace unhealthy instances automatically; passes terraform validate.

Terraform, AWS, Auto Scaling, IaC

End-to-End DevSecOps CI/CD Pipeline

Implemented an eight-stage CI/CD pipeline (build, test, security scan, deploy) with all stages passing green.

GitHub Actions, Docker, security scanning, GitOps

EDUCATION & CERTIFICATIONS

MBA, Dual Specialization: Information Systems Management / Analytics and Data Science

Ongoing - 2027

Manipal University Jaipur

B.E. Electronics and Instrumentation — Panimalar Engineering College (CGPA 8.1)

2017 - 2021

Certifications: Microsoft AZ-900 (Azure Fundamentals), DP-900 (Data Fundamentals); Certified Kubernetes Administrator (CKA) - in progress.

Recognition: National-level winner, Smart India Hackathon 2020. Attended KubeCon + CloudNativeCon India 2025 and 2026.
