

DINESH RAVICHANDIRAN

Site Reliability Engineer | Cloud Operations, Observability & Automation

Pune, India - +91-9790808608 - dineshravichandiran0808@gmail.com

linkedin.com/in/dineshravichandiran - github.com/dineshravichandiran - dineshravichandiran.vercel.app

PROFESSIONAL SUMMARY

Site Reliability Engineer with 3.5+ years running 24x7 production operations for distributed, microservice-based SaaS platforms on AWS and Azure, serving 50+ Fortune 500 customers. Resolved 5,000+ incidents with a focus on triage, root cause analysis, reducing MTTR, and blameless postmortems. Extended production reliability work into AIOps (ML-driven alert correlation and anomaly detection), Kubernetes self-healing and chaos engineering, secure configuration auditing, network/OSI-layer diagnostics, and infrastructure-as-code - building and verifying each self-directed project live rather than assuming it works. AZ-900 and DP-900 certified, CKA in progress, pursuing an MBA alongside deeper SRE and platform-reliability work.

TECHNICAL SKILLS

Reliability & SRE: Incident response, on-call, RCA, blameless postmortems, SLI/SLO and error budget awareness, availability and latency tracking, MTTR reduction, toil reduction, runbook automation, AIOps

Observability: Zabbix, Prometheus, Grafana, Sumo Logic, Catchpoint, PagerDuty, AWS CloudWatch

Cloud & Distributed Systems: AWS (EC2, S3, CloudWatch), Microsoft Azure, AKS, microservices architecture, capacity planning and cost optimization

Containers & Orchestration: Docker, Kubernetes (CKA in progress), kubectl, k9s, chaos engineering

Networking: DNS, TCP/IP, OSI-layer troubleshooting, HTTP(S) diagnostics, TLS/certificate management

IaC, Automation & CI/CD: Terraform, Ansible, SaltStack, GitHub Actions, Bash, PowerShell, Python

Security: Secret scanning, SAST, SCA, container scanning, DAST, secure server configuration auditing

Data & ML: pandas, scikit-learn, PostgreSQL (RDBMS), algorithmic root-cause classification

ITSM: ServiceNow, ITIL incident/problem/change management

PROFESSIONAL EXPERIENCE

Cloud Services Specialist NOC Engineer, PTC Inc. — Jun 2026 - Present

Pune, India - On-site (internal transfer from Gurgaon, Sep 2026)

- Own 24x7 production monitoring and incident response for distributed enterprise SaaS platforms and microservice infrastructure on AKS, across 50+ Fortune 500 customers.
- Resolved a backlog of alerts marked closed in PagerDuty but still open in Zabbix, closing a real monitoring-accuracy gap for ISO audit compliance - recognized with PTC's SO&S Quality Compliance Award.
- Perform pod- and node-level Kubernetes (AKS) troubleshooting with kubectl and k9s - CrashLoopBackOff, OOMKilled, node scale-downs.

Cloud NOC Technician, PTC Inc. — Nov 2025 - May 2026

Gurgaon, India - Remote

- Collaborated with the Technical Architect team to evaluate use cases and align on best practices for scalable, informed infrastructure decisions.
- Authored and enhanced knowledge articles - including a memory-optimization runbook for clustered nodes now adopted as the org-wide NOC standard - reducing toil, improving performance, and cutting infrastructure cost. Recognized with PTC's Performance & Efficiency Award.

Cloud NOC Technician, Associate, PTC Inc. — Dec 2022 - Oct 2025

Gurgaon, India - Remote

- Resolved 5,000+ production incidents across AWS and Azure with 99.9% uptime for 50+ Fortune 500 environments, reducing MTTR through systematic root cause analysis over 2.5+ years with the Technical Architect team.
- Diagnosed issues via Sumo Logic and AWS CloudWatch; Linux/Apache/Tomcat troubleshooting across 200+ servers; authored 10+ runbooks under ITIL change management via ServiceNow.
- Recognized with PTC's CrowdStrike and DigiCert Recovery Award for stabilizing customer environments during the CrowdStrike global incident and a DigiCert certificate expiry.

SELF-DIRECTED PROJECTS

AI/ops Alert Correlation & RCA Engine

Algorithmic root cause suggestion on top of production alert data: a sliding-window event correlator (76.9% noise reduction: 13,833 raw alerts to 3,197 real incidents), an IsolationForest anomaly detector, and a RandomForest classifier (56.8% accuracy vs. ~12.5% random-chance baseline). 8 passing tests.

Python - scikit-learn - pandas - IsolationForest - RandomForest

Kubernetes Self-Healing & Chaos Lab

Controller detects and auto-remediates CrashLoopBackOff and OOMKilled in a distributed Kubernetes environment; chaos scripts deliberately trigger both. Verified live in a kind cluster: both failures triggered, detected, and remediated within seconds, fully logged.

Kubernetes - kind - Python - Chaos Engineering - Distributed Systems

net-healthcheck

OSI-layer connectivity diagnostics in one tool: DNS resolution, TCP reachability, HTTP(S) checks, and TLS certificate expiry, with Nagios-convention exit codes. Testing against real targets caught 3 real bugs, including bash's /dev/tcp silently not working on Apple's shipped bash. 14/14 tests passing.

Bash - Networking - DNS - TCP/IP - TLS - OSI

End-to-End DevSecOps CI Pipeline

GitHub Actions pipeline gating every deployment behind secret scanning, SAST, SCA, container vulnerability scanning, and DAST as part of a broader cybersecurity practice. Debugged and fixed 3 real failures blocking it end-to-end; all 8 security and deploy stages run green today.

GitHub Actions - Cybersecurity - Vulnerability Scanning - SAST - DAST - CI/CD

ops-toolkits

Five change-window and config-drift tools, including a web-server config auditor that flags real security misconfigurations (exposed status pages, weak TLS, unpatched admin consoles) in both Bash and PowerShell. 200/200 tests passing, each verified with a real screenshot.

Bash - PowerShell - Secure Configuration - RDBMS Health Checks - Nagios Exit Codes

Also self-directed: Runbook Automation Engine (YAML check-remediate-verify with audit logging), Grafana + Prometheus observability stack, Ansible Zabbix onboarding & host baseline, Salt self-healing memory guard - full detail at dineshravichandiran.vercel.app.

EDUCATION & CERTIFICATIONS

MBA, Dual Specialization: Information Systems Management / Analytics and Data Science - Manipal University Jaipur - 2025-2027 (Expected)

B.E. Electronics and Instrumentation - Panimalar Engineering College, CGPA 8.1/10 - 2018-2022

Certifications: Microsoft AZ-900 (Azure Fundamentals), DP-900 (Data Fundamentals); Certified Kubernetes Administrator (CKA) - in progress.

Recognition: National-level winner, Smart India Hackathon 2020 (10,000+ competing teams). PTC SO&S Quality Compliance Award, Performance & Efficiency Award, and CrowdStrike/DigiCert Recovery Award. Attended KubeCon + CloudNativeCon India 2025 & 2026.
