SUMMARY

Cloud Services Specialist NOC Engineer with 3+ years of hands-on experience supporting PTC PLM Windchill, ThingWorx, and FlexPLM platforms on Private Cloud (AWS) and Windchill+ (Azure) for Fortune 500 customers. Strong skills in Windchill application troubleshooting, Linux operations, cloud infrastructure, and ServiceNow-based incident management. Experienced in maintaining detailed technical documentation, collaborating with Cloud and Product Support teams, and working in 24x7 operations including nights and weekends.

SKILLS

PTC PLM Platforms: Windchill, Windchill+, ThingWorx, FlexPLM, Windchill Application Troubleshooting, PLM Hosted Environments

Cloud Infrastructure: AWS EC2 (instance monitoring, memory and resource checks), Microsoft Azure Virtual Machines (running state, allocation, resource monitoring), Private Cloud and Windchill+ Hosted Environments

Operating Systems and Middleware: Linux (RHEL, CentOS, Ubuntu), Linux Commands and Operations, Apache, Tomcat, Bash Scripting, SSH, Performance Tuning

ITSM and Process: ServiceNow, ITIL Framework, Incident Management, Alert Monitoring, Ticket Escalation, Root Cause Analysis, SLA Adherence, Documentation

Networking: DNS, TCP/IP, Networking Fundamentals, Load Balancers, VPN

Tools and Communication: Microsoft Word, Excel, PowerPoint, Outlook, Salesforce Knowledge Base, Strong Written and Verbal English

WORK EXPERIENCE

Cloud Services Specialist NOC Engineer

December 2022 - Present

Parametric Technology Corporation (PTC), Pune, India

- Provide 24x7 production support for PTC PLM Windchill, ThingWorx, and FlexPLM platforms on Private Cloud (AWS) and Windchill+ (Azure) for 50+ Fortune 500 customers, resolving 5,000+ production incidents with 99.9% uptime.
- Resolved recurring Zabbix unresolved alerts through systematic root cause analysis, reducing memory-related alerts across production environments over 3.5+ years of focused effort.
- Collaborated closely with the Cloud Technical Architects team using internal diagnostic tools to analyze and share memory utilization data, jointly resolving persistent memory issues.
- Investigate and triage application and infrastructure alerts including web server outages, application service downtime, high resource utilization, and Java process spikes.
- Diagnose issues by logging into affected servers and analyzing logs in Sumo Logic to pinpoint root cause, then resolve directly or escalate detailed findings to the NOC Central and Incident Management teams.
- Monitor application availability through Catchpoint, investigating URL-down events and outage timelines, creating cases for the Incident Management team and coordinating other teams as needed.
- Monitor AWS EC2 instances and Azure Virtual Machines for memory consumption, resource utilization, and running or deallocated states across hosted production environments.
- Perform Linux (RHEL, Ubuntu) command-line troubleshooting across 200+ production servers, investigating CPU, memory, disk, and network issues; resolve issues directly where possible (service restarts, Apache and Tomcat fixes) and escalate complex cases to the NOC Central team.
- Manage monitoring enable and disable tickets, coordinating monitoring suppression during planned maintenance and re-enabling post-activity to maintain alert accuracy.
- Authored 3+ runbooks for memory alert resolution and monitoring procedures, and continuously edit and improve existing runbooks with updated steps as new fixes are identified, mentoring new hires across a 12-member team.
- Participate in scheduled maintenance windows including nights and weekends, collaborating with Cloud support and Product Support teams.

Full-time Intern (Graphics Design - BMS Projects)

July 2022 - November 2022

Johnson Controls, Pune, India

- Designed building visualization graphics for 30+ automation projects serving international clients, creating floor layouts, walls, and 3D building images using 3D design software and refining them in Photoshop for customer review and approval.

Programmer Analyst Trainee

January 2022 - June 2022

Cognizant Technology Solutions, Bangalore, India

- Completed a 6-month paid final-year internship: trained in full-stack fundamentals, SQL, and databases, then specialized in Java, building a Spring Boot MVC project with MySQL as the capstone. Earned a full-time offer based on internship performance.

ACHIEVEMENTS

- Received PTC Cheers Award (Performance and Efficiency) for collaborating with the Technical Architect team on best practices and knowledge articles, improving customer application performance and optimizing infrastructure cost.
- Received Customer First Award at PTC for exceptional operational impact and customer satisfaction across 50+ enterprise accounts.
- Won Smart India Hackathon at the national level, competing against 10,000+ teams.
- Attended KubeCon and CloudNativeCon India 2025, networking with 2,000+ cloud native professionals.

CERTIFICATIONS

- Microsoft Certified: AZ-900 Azure Fundamentals - Microsoft, 2023.
- Microsoft Certified: DP-900 Data Fundamentals - Microsoft, 2023.
- Advanced Kubernetes Operations and Linux System Administration - KodeKloud, 2024.

EDUCATION

MBA - Information System Management / Analytics and Data Science | Manipal University Jaipur | 2025 - 2027 (Expected)

Bachelor of Engineering - Electronics and Instrumentation | Panimalar Engineering College | 2018 - 2022 | CGPA: 8.1 out of 10
