PROFESSIONAL SUMMARY

Site Reliability Engineer with 3.5+ years running 24x7 production operations for enterprise SaaS platforms on AWS and Azure, serving 50+ Fortune 500 customers. Resolved 5,000+ incidents with a focus on triage, root-cause analysis, and blameless post-mortems. Extended production reliability work into AIOps (ML-driven alert correlation and anomaly detection), Kubernetes self-healing and chaos engineering, and infrastructure-as-code — building and verifying each self-directed project live rather than assuming it works. AZ-900 and DP-900 certified, CKA in progress, pursuing an MBA alongside deeper SRE and platform-reliability work.

TECHNICAL SKILLS

Reliability & SRE	Incident response, on-call, RCA, blameless post-mortems, SLI/SLO awareness, runbook automation, AIOps
Observability	Zabbix, Prometheus, Grafana, Sumo Logic, Catchpoint, PagerDuty, AWS CloudWatch
Cloud	AWS (EC2, S3, CloudWatch), Microsoft Azure, AKS
IaC, Automation & CI/CD	Terraform, Ansible, SaltStack, GitHub Actions, Bash, Python
Data & ML	pandas, scikit-learn, PostgreSQL
Containers & ITSM	Docker, Kubernetes (CKA in progress), ServiceNow, ITIL incident/problem/change

PROFESSIONAL EXPERIENCE

Cloud Services Specialist NOC Engineer — PTC Inc.

Jun 2026 – Present

Pune, India · On-site (internal transfer from Gurgaon, Sep 2026)

- Own 24x7 production monitoring and incident response for Windchill, ThingWorx, FlexPLM, and microservice infrastructure on AKS across 50+ Fortune 500 customers.
- Resolved a backlog of alerts marked closed in PagerDuty but still open in Zabbix, strengthening monitoring accuracy for ISO audit and compliance — recognized with PTC's SO&S Quality Compliance Award.
- Perform pod- and node-level Kubernetes (AKS) troubleshooting with kubectl and k9s — CrashLoopBackOff, OOMKilled, node scale-downs.

Cloud NOC Technician — PTC Inc.

Nov 2025 – May 2026

Gurgaon, India · Remote

- Collaborated with the Technical Architect team to evaluate use cases, review scenarios, and align on best practices for scalable, informed decisions.
- Authored and enhanced knowledge articles — including a memory-optimization runbook for clustered PLM nodes now adopted as the org-wide NOC standard — improving performance and reducing infrastructure cost. Recognized with PTC's Performance & Efficiency Award.

Cloud NOC Technician, Associate — PTC Inc.

Dec 2022 – Oct 2025

Gurgaon, India · Remote

- Resolved 5,000+ production incidents across AWS and Azure with 99.9% uptime for 50+ Fortune 500 environments; drove recurring memory/OutOfMemory alerts to root cause over 2.5+ years with the Technical Architect team.
- Diagnosed issues via Sumo Logic and AWS CloudWatch; Linux/Apache/Tomcat troubleshooting across 200+ servers; authored 10+ runbooks under ITIL change management via ServiceNow.
- Recognized with PTC's CrowdStrike and DigiCert Recovery Award for stabilizing customer environments during the CrowdStrike incident and DigiCert certificate expiry.

SELF-DIRECTED PROJECTS

AIOps Alert Correlation & RCA Engine

Sliding-window event correlator (76.9% noise reduction: 13,833 raw alerts → 3,197 real incidents), an IsolationForest anomaly detector, and a RandomForest root-cause classifier (56.8% accuracy vs. ~12.5% random-chance baseline across 8 categories). 8 passing tests.

[Python](#) · [scikit-learn](#) · [pandas](#) · [IsolationForest](#) · [RandomForest](#)

Kubernetes Self-Healing & Chaos Lab

Controller detects and auto-remediates CrashLoopBackOff and OOMKilled; chaos scripts deliberately trigger both. Verified live in a kind cluster inside a GitHub Codespace — both failures triggered, detected, and remediated within seconds, fully logged.

[Kubernetes](#) · [kind](#) · [Python](#) · [Chaos Engineering](#)

ops-toolkits — Change-Window & Config-Drift Suite

Five ops tools sharing one design (Nagios exit codes, report-only/read-only, no mocks in tests): windchill-ops-toolkit, deploy-validator, upgrade-preflight, db-healthcheck (real Docker Postgres), and webserver-config-audit (independent Bash + PowerShell). 200/200 tests passing, each verified with a real screencapture of the suite running.

[Bash](#) · [PowerShell](#) · [Nagios Exit Codes](#) · [Config Drift](#)

Also self-directed: Runbook Automation Engine (YAML check → remediate → verify, verified against real failures), Grafana + Prometheus observability stack, Ansible Zabbix onboarding & host baseline, Salt self-healing memory guard, and a Zabbix platform-engineering lab — full detail at dinesh-ravichandiran.netlify.app.

EDUCATION & CERTIFICATIONS

MBA, Dual Specialization: Information Systems Management / Analytics and Data Science — Manipal University Jaipur · 2025 – 2027 (Expected)

B.E. Electronics and Instrumentation — Panimalar Engineering College, CGPA 8.1/10 · 2018 – 2022

Certifications: Microsoft AZ-900 (Azure Fundamentals), DP-900 (Data Fundamentals); Certified Kubernetes Administrator (CKA) — in progress.

Recognition: National-level winner, Smart India Hackathon 2020 (10,000+ competing teams). PTC SO&S Quality Compliance Award, Performance & Efficiency Award, and CrowdStrike/DigiCert Recovery Award. Attended KubeCon + CloudNativeCon India 2025 & 2026.
